

Spring 2016 Master Naturalist Classes

Master Naturalist

St. Louis Community College
Continuing Education

3221 McKelvey Road, Suite 250 • Bridgeton, MO 63044 • 314-984-7777

The St. Louis Community College Office of Continuing Education offers students the opportunity to complete the **Master Naturalist** Program. This course of study includes both credit and non-credit classes. A non-credit **Master Naturalist** Certificate will be awarded to individuals completing all components of the program.

The following classes may be taken for your own personal enrichment or as a part of the **Master Naturalist** program.

Contact Continuing Education at 314-984-7777 for program requirements.

Ecology

It's OK to Eat the Weeds-Wild Edible Plants of Spring

The next time you weed your garden, you might find you have the makings for a unique dish! Join Dr. Catrina Adams, Ph.D. in Paleoethnobotany (how people have used plants in the past) to learn about some of the common edible plants that grow in and around St. Louis in the spring. Discover where to find them, how to identify and collect them, and how to eat them! Then, take a tour of the campus to identify edible and useful plants you probably walk past every day. Some wild edibles are lovely native plants that you may want to cultivate in your own backyard. Others might be growing in your lawn or garden already, for better or for worse!

Indoor Composting: Make and Take Home a Bokashi Bucket

Don't throw away those scraps - up to 20% of household trash can be composted! The bokashi bucket system can be used year-round; it's quick, convenient and no household smells. In this hands-on session, you will construct and learn to maintain an indoor composting system capable of decomposing food and house plant trimmings for a family of four. In a space-saving bokashi system, effective microorganisms transform all types of kitchen waste into a nutrient-rich soil amendment. All equipment, materials and handouts provided and included in fee. You'll leave class with a working indoor composting system in the form of a bokashi bucket. Class offered in partnership with the Missouri Botanical Garden Earthways Center. Registration deadline 3/23. No refunds this date.

DIY: Making Bran for a Bokashi Bucket Composting System

Bokashi is a great space-saving way to compost at home that uses a bran mixture of carbon-rich materials and effective microorganisms to transform kitchen waste into a great fertilizer for your garden. The bokashi bucket system can be used year round, it's quick, convenient and produces no household smells with the help of this bran mixture! Designed for individuals who currently have a bokashi bucket, you'll make a one pound mixture of the bran in class and take home the recipe and know how to make more with just a few easy steps. Don't have a bokashi bucket yet? Register for the **Make and Take Home a Bokashi Bucket** class or get an instruction sheet in the DIY Bran class to build your own at home. Class offered in partnership with the Missouri Botanical Garden Earthways Center. Registration deadline 4/27. No refunds after this date.

Backyard Chickens for the Beginner

Have you thought about keeping chickens in your city or suburban backyard? There's a lot to find out about before you get started. Learn about local ordinances and where to find more information for the area where you live. You'll also hear about the benefits of keeping chickens, appropriate housing and feeding and different ways of keeping your chickens healthy and happy. Instructor has years of personal and professional experience and is an enthusiastic and knowledgeable, healthy chicken-farmer! Bring a sack lunch to class.

All About Herbs

Now is the time to plan for your summer garden! Learn how to get the most for your effort in this one-night class. From starting to expanding an herb garden, you'll learn about soil conditions, fertilizing and the optimal placement for growth. Come hear the best advice from Master Gardener "Mike" on how to plant, maintain and harvest an herb garden. You'll also get tips on using herbs in and around your home as well as the best way to freeze and preserve herbs for future use. Bring a notebook and pen to class.

Grow Your Own: Mushroom Garden in a Bucket

Wouldn't you like to pick your own quality mushrooms at the peak of freshness to use in your morning omelet or evening gourmet meal? Come discover how easy it is to "grow your own" in a compact bucket which can be used indoors or out. Class will begin with a short presentation on growing mushrooms and then you'll get hands-on experience assembling the bucket, growing medium and spawns to get the process started and take home. It's time to add mushrooms to your food garden list and start discovering the many opportunities that exist in your own home. Registration deadline 3/24. No refunds after this date.

Native plants, or simply “natives” are species that have evolved and occur naturally in local geographic areas. In the Midwest region, native plants are adapted to local soil conditions, rainfall and temperature patterns, and generally do not require any special maintenance needs after they are established in the right environment, saving you both time and money. Most importantly, native plants function in the landscape by attracting and furnishing a habitat for a host of wildlife including birds, butterflies and beneficial insects and providing you with a healthy environment in which to live.

Classes are presented by Dave Tylka, biologist, photographer, native landscape and wildlife author of *Native Landscaping for Wildlife and People*; Nancee Kruscheck, gardening expert and local nursery owner. Courses offered in this section focus only on Midwest native species and qualify for the Master Naturalist certification.

An Introduction to Native Landscaping

Bring a bit of nature to your urban or suburban home. Come discover the many benefits of native landscaping, also known as “naturescaping”, and enrich your life by bringing low maintenance plants to your yard or workplace and developing a natural ecosystem to attract animals and beneficial insects. Learn why native coneflowers, milkweeds, viburnums and oaks are more beneficial than non-native hostas, daylilies, crape myrtles, and Bradford pears, explore why biodiversity is healthy, and why cultivars should be scrutinized. You’ll also receive information on assistance and resources available through the St. Louis Audubon “Bring Conservation Home” program to help get you started. We face many environmental challenges and this is your opportunity to extend your commitment to make a difference.

Create a Beautiful Landscape with Native Plants

Enrich the diversity in your yard by discovering and planting species native to Missouri. You can create a beautiful and interesting landscape with a progression of plants that are perfectly adapted to our unique soil and climate. The natives you’ll learn about will reduce mowing and improve biodiversity while fitting nicely into your home landscape. Some natives are ideal for your perennial gardens and problem areas. You’ll be delighted at how beautiful the native plants are and enjoy learning some plant folklore.

Identification and Ecology of Common Missouri Wildflowers

Have you ever wanted to explore the scientific approach to identifying wildflowers? This is your chance to get an introduction into flora classification. Missouri is a crossroads of several different natural communities across the Midwest and supports a wide array of native and non-native wildflowers. You’ll explore basic flower parts and leaf arrangements and then determine the distinguishing and unique characteristics of over 60 common species organized by color and chronology. You are encouraged to bring a copy of Denison’s Missouri Wildflowers (6th Ed.) published by the MO Conservation Dept. for use in the class. Book is available at most area bookstores, nature centers and libraries.

Native Landscaping with Shade-Adapted Plants

Successfully growing plants under large trees can be challenging, but if you mimic nature by planting ecologically adapted natives, you can enjoy a green, biodiverse landscape throughout the seasons. Several spring native wildflowers bloom also before most large trees leaf out and shade-adapted shrubs can thrive under low-light conditions. Join us and learn how to establish and maintain shade-adapted landscapes.

Native Landscaping with Sun-Adapted Perennials

Did you know that prairies and glades are the two most diverse and colorful natural communities in Missouri that thrive in the sun? Learn basic characteristics of the soil and moisture conditions of these communities and how they can be emulated in your home landscape. Presentation will focus on native prairie and glade species that can be successfully grown in the St. Louis area, the height and spread of each species and where each species will grow best in your yard.

Native Landscaping for Bees, Butterflies and Other Pollinators

Butterflies go wherever they please and please wherever they go. Along with bees and other insect pollinators, they are environmental barometers. Healthy landscapes have large numbers and a wide diversity of pollinators—contaminated or altered landscapes do not. The best plants lure pollinators to their flowers by offering pollen, nectar, resin and oil, and by evolving visual and olfactory cues such as nectar guides, color and fragrance. Come get practical advice on getting started for selecting the optimal natives to attract various groups of pollinators.

Ways to Attract Songbirds and Hummingbirds through Native Landscaping

Are you looking to attract more songbirds and hummingbirds to enhance your backyard viewing? Learn the secrets to selecting the best native plants that furnish seeds, flowers and fruits for these birds. To attract the greatest diversity of birds to your property at various seasons, you need to select fruiting shrubs and trees from different categories based upon the season the fruits and seeds are produced, their nutritional make-up and the length of time they remain on the plants. Bring a kaleidoscope of colors and songs to your landscape with your knowledge from this class.

Native Landscaping with Shrubs

Stop spending your time and money trying to maintain shrubs that are not indigenous to the Midwest and have difficulty adapting to local soil and weather conditions. Go native and begin to add more environmentally beneficial shrub species. Native shrubs that have evolved in the Midwest are adapted to local rainfall and temperature patterns and generally do not require any special maintenance needs after they are established. Because of this evolution, these native woody species have produced unique interrelationships with many native species of wildlife. Lots of suggestions will be presented to help you get started.

Identification and Natural History of Common Missouri Insects

Ever wonder why insects are the most successful and ecologically important class of animals in the world? They form a vital link between plants and vertebrate animals, such as birds and mammals. Although their biodiversity can be overwhelming, after learning some basic anatomy, you’ll be able to identify ten major groups or orders of insects and recognize the most commonly encountered species found in the greater St. Louis area. See close-up images of insects, discuss their natural history and receive identification resources to take home. Students are encouraged to obtain the Golden Guide paperback titled, “Insects” for use in class. Book is available from most area bookstores and libraries.

Introduction to Beekeeping

Of the 4,000 native species of bees that live in North America, Missouri is home to more than 400 bee species—including 10 bumblebees. Honey bees are an exotic species first introduced into the New World in 1622. Bees play an important role in agriculture as pollinators of flowering plants that provide food, fiber, spices, medicines and animal forage. Beekeeping can be a hobby, a secondary business, or a full-time vocation. It is a relatively inexpensive hobby that provides a sweet bonus each year. Is beekeeping right for you? Come and learn how to attract native pollinators and honey bees by planting a pollinator-friendly garden and constructing nesting habitat for native pollinators. We will also present introductory information on getting started with beekeeping and honey bee products of the hive.
