

Summer 2017

Master Naturalist

St. Louis Community College
Continuing Education

3221 McKelvey Road, Suite 250 • Bridgeton, MO 63044 • 314-984-7777

The St. Louis Community College Office of Continuing Education offers individuals the opportunity to complete the **Master Naturalist** program. This course of study includes both credit and non-credit classes. A non-credit **Master Naturalist** award of completion will be granted to individuals completing all components of the program.

The following classes may be taken for your own personal enrichment or as a part of the **Master Naturalist** program.

Contact Continuing Education at 314-984-7777 for program requirements.

Ecology

Backyard Chickens for the Beginner

Have you thought about keeping chickens in your city or suburban backyard? There's a lot to find out about before you get started. Learn about local ordinances and where to find more information for the area where you live. You'll also hear about the benefits of keeping chickens, appropriate housing and feeding and different ways of keeping your chickens healthy and happy. Instructor has years of personal and professional experience and is an enthusiastic and knowledgeable, healthy, chicken-farmer! Bring a sack lunch to class.

Guy Niere
MC - SW, 105

Chicken Safety and Trapping Options

Secure your investment in your chickens and ward off potential predators before they attack! There's nothing worse than having your chickens attacked by a predator. If you're new to raising chickens, you might not be aware of what predators are around. Or, you may think that since you live in the suburbs or within city limits, you don't have to worry about predators. Take the offensive and learn how to protect your flock from dogs, birds of prey, foxes, coyotes, raccoons, possum, mink and weasel. Examine coop security: trapping through live traps, dog proof leg traps, snares, weasel box traps and body traps, netting, and simple tactics to scare off predators. You'll also learn about the laws surrounding protection of your flock and the associated safety precautions of your actions.

Indoor Composting: Make and Take Home a Bokashi Bucket

Don't throw away those scraps - up to 20% of household trash can be composted! The bokashi bucket system can be used year-round: it's quick, convenient and has no household smells. In this hands-on session, you will construct and learn to maintain an indoor composting system capable of decomposing food and house plant trimmings for a family of four. In a space-saving bokashi system, effective microorganisms transform all types of kitchen waste into a nutrient-rich soil amendment. All equipment, materials and handouts provided and included in fee. You'll leave class with a working indoor composting system in the form of a bokashi bucket. Class offered in partnership with the Missouri Botanical Garden Earthways Center. Registration deadline 6/19. No refunds after this date.

Landscape and Gardening

All About Herbs

There is still time to get your summer herb garden started. Learn how to get the most for your effort in this one-night class. From starting to expanding an herb garden, you'll learn about soil conditions, fertilizing, and the optimal placement for growth. Come hear the best advice from Master Gardener "Mike" on how to plant, maintain and harvest an herb garden. You'll get tips on using herbs in and around your home as well as the best way to freeze and preserve herbs for future use. Bring a notebook and pen to class.

Small Yard Landscape and Gardening

Do you live in a home with a small yard for landscaping and gardening? Get your green thumb ready and explore ornamental species and hybrids of plants, trees, shrubs, vegetables, and herbs designed for small spaces. You'll learn to use color, vertical design, foliage and texture to make your small yard into a show-stopping, attention-getting focal point for you to enjoy.

Beginning Summer 2017

All new Master Naturalist participants must attain a grade of C or higher for credit classes in order to qualify toward the Master Naturalist program requirements. Individuals who began working toward Master Naturalist credit class requirements prior to summer 2017 will be grandfathered in to take classes by audit.

New Propagating Missouri Native Plants

Learn how to propagate Missouri native plants through seed, cuttings, division, root cuttings and layering. This course is designed to encourage an interest, understanding, and appreciation of the principles and techniques of plant propagation. Discussion will address collecting, storing and germinating seeds and will demonstrate the various methods for propagating plants through cutting.

New Fertilizer and PH ABCs

Is your pin oak turning yellow? Is your potting soil too old? Having trouble growing azaleas? What PH is best for your plants, trees and grasses? Come learn about the importance of PH and how charged particles interact with the soil to affect growing conditions. Discussion will focus on the benefits of organic fertilizers and use of inorganic fertilizers in improving your outdoor surroundings. You'll be the envy of the neighborhood with a green, healthy landscape.

The 'Other' Part of Gardening: Care and Maintenance of Flowers and Shrubs

Powdery mildew taking over your plants? Are your roses in need of deadheading? What's "bugging" your greenery and shrubs? Why are your plants not flowering? Learn how to maintain vigorous plants that continue to thrive throughout the season. With regular maintenance, you can keep your plants looking their best. Nursery owner Nancee Kruescheck will teach you "tips and tricks" on feeding, pruning and dealing with common pests and diseases. Bring your questions to class for this informative session.

Hot Summer Heat: Keeping Your Yard and Garden Alive

Keeping your yard and garden flourishing throughout a typical St. Louis summer is a challenge for all of us. In May and June our yards are lush and green, our gardens are blooming; then comes July and August with intense sun and drought conditions. Join our gardening expert and nursery owner, Nancee Kruescheck, as she teaches you how to keep your plants and turf less stressed in our Midwest heat, humidity, water (lack of) and soils. Also, she'll talk about plants that like it here and do well in our area.

Nature

New Nature Walk - Wildflowers, Woods and Prairies

The learning opportunities derived from a nature walk are endless. Open your senses to the natural world and experience the magnificence and serenity of the environment of Shaw Nature Reserve's wildflowers, woods and prairies. Join our small group tour with Naturalist Nancy for an informative one mile walk to explore, discover and study the summer landscape. Paths are either chipped or gravel and have moderate hills. Wear comfortable shoes and dress appropriately for the weather. In case of rain, class will be rescheduled to June 24. Meet at the picnic tables across from the visitor's center.

New Botanical Treasures of Don Robinson State Park

Come explore the many botanical treasures of the new Don Robinson State Park located in the upper watershed of the LaBarque Creek. Join local native plant experts as they guide you through sandstone box canyons, shelter caves, cliffs, glades and upland and bottomland forests. Class presentation will review these geographical treasures and its history. Then, you will use the information learned to explore the park on two field trips on 6/17 and 6/24. Provide own transportation. This class is offered in partnership with the Missouri Native Plant Society.

Geology of Missouri

Spend a few hours learning about the geology and geography of Missouri in an informal atmosphere. We will discuss how our state has been shaped by glaciations, earthquakes, uplift, and warm, shallow seas. Learn about the processes that gave us the nickname "The Cave State." We will also take a look at the economic impact rocks and minerals have had on our state's economy.

Looking at Summer Night Skies

Class meets on Mondays and Wednesdays. Observe and enjoy the night skies of summer. Learn how to find and identify the constellations and planets of this summer with the unaided eye, binoculars and telescopes. Discover how to observe meteors, auroral displays, artificial satellites and other naked eye phenomena. An introduction on how to observe the moon, planets, stars, constellations and nebula with a telescope will also be covered. Required: The current issue of Sky and Telescope (Sky Publishing) and The Night Sky 30-40 degree planisphere (Large; North Latitude) \$11.35 on amazon.com or equivalent planisphere. Publication Date: January 1, 1998; ISBN-10: 0961320753 or ISBN-13: 978-0961320751. Field trip to the Planterium will be discussed in class.

The Wonders of Weather with TV Meteorologist John Fuller

Join KPLR-TV Chief Meteorologist John Fuller as he shares his knowledge from the basics of weather instruments to their function in making a forecast. Exciting labs will have you building the weather maps seen on television and understanding the technical terms. Fun experiments will demonstrate how rain, hail and tornadoes develop. We will examine tornado case events and the dynamics behind them. Finally, we will explore internet techniques that will make you the weather expert in your family or group of friends in just three hours. If you have ever wondered why the sky is the color blue, or why the weather changes so quickly, this class is for you!

Forest Park Owls: Hiding in Plain Sight

Join award-winning, naturalist and speaker Mark H.X. Glenshaw and discover details into the lives of a local mated pair of Great Horned Owls in Forest Park. Mark has been closely observing and documenting the owls since 2005. You'll learn how he found the owls, basic facts about the species, and the different behaviors he observes and documents with photos and videos to illustrate these behaviors. Don't be surprised if you find yourself looking for owls after this course in a follow up instructor led Owl Prowl!

Managing Hives for Honey Production, Extracting and Bottling Instruction

Designed for individuals who are currently involved in beekeeping, those who are thinking about keeping bees and want to learn more about the harvesting of honey and folks just interested in learning about the process. You'll learn the concepts of honeybee development and identifying seasonal patterns to prepare your colonies for honey production; what to expect with a honey harvest, as well as when and how to process bottled local honey. Come explore the different colors and flavors of honey, what makes honey different from other sugars, and how to cook with and pair honey with other foods.
