Application for Nursing Contact Hours Submitted to PSNA

Nourishing the Nurturer (8 hours) **NEW**

This course offers an exploration of ways to nourish ourselves as family and community caregivers. As caregivers we have a tendency to put our own well-being last on the priority list. During these 4 classes we will discuss and explore ways to nourish our health and wellness by telling our own "food story" as a way to better understand the role food plays in our primary relationships and how to approach and reflect on what our food cravings are telling us and the important role these cravings play. We will discuss ways stress and compassion fatigue affect our eating habits, the role anxiety and caffeine play in getting a better night sleep. The importance of good "gut" and digestion health will also be reviewed. Caregiving is a lifestyle and a beautiful gift we give those to whom we care for – we owe it to ourselves to care enough about our health. *Kimberly Rabago*

The Mindfulness-Based Stress Reduction (MBSR) program was developed by Jon Kabat-Zinn at the University of Massachusetts Medical School's Center for Mindfulness more than 25 years ago. Since then, this eight-week program has been offered in a variety of international settings. Mindfulness in MBSR can be most simply described as the intentional cultivation of nonjudgmental moment-to-moment awareness" (Kabat-Zinn, 1996). "Three key elements of the definition—intentionality, present-centeredness and absence of judgment—are repeated and reinforced through the MBSR teachers in classes unfolding week by week around the world" (McCown, Reibel, Micozzi, page 64). This course follows the model MBSR 8-week plus a full day of mindfulness. *Edie Eileen Elkan, B.A., M.A.*

During class, Dr. Holder will ask for volunteers who would like to experience a past life regression through hypnosis.
