Introduction to Digital Photo Editing

Ages 14 & up NEW!

Make the most of your photos after you have taken them. Learn how and why to crop out parts of the image, adjust image brightness, sharpness, and the accuracy of the colors in your images. Combine two or more images in a new composition, add text and shapes to images, add and remove people, change the expressions on their faces, and maybe even open the eyes of people who blinked in a family fun portrait. We will use free online photo software in this class. The lessons and skills will be easily adaptable to other programs like Adobe Photoshop.

Combining Photos — “Compositing”

Ages 14 & up NEW!

Sometimes there is a magical, ‘special-effects’ use for combining two or more images; sometimes the use is strictly practical. Putting a child on the back of a butterfly is a fanciful special effect. Replacing a bad background in the image of an item you want to sell online is a strictly practical use. But whether your intention is fanciful or practical, you’ll use the same techniques and the same tools to reach either goal. Learn those tools and techniques in our new Photo Compositing class.

Portrait Retouching

Ages 14 & up NEW!

There are many different ways to enhance face (and figure!) images to minimize or eliminate blemishes, blotchiness, shadows, stray hairs, bulges, bellies, cellulite, and other ‘imperfections’ we find in our all-too-human subjects. But ‘fixing’ an image is not the only use for retouching. In many eye-catching portraits all the visible drama is added in the retouching stage, long after the photo was taken. Learn retouching basics in this new class and WOW your subjects.
